Hello, I have a relative who developed cancer, and she has Roundup in basement stored in winter, Roundup used all over her yard in growing season, and had been led to believe Roundup is safe, by the businesses who sell it. It is criminal that this corporation Monsanto can get away with false and incomplete testing of its product, without criminal charges being brought up. Roundup apparently eliminates nutrient absorption and thus aids in development of leaky gut. Roundup also has been shown to produce massive tumor growth in reproductive systems, and lymph system cancers, and bone cancers, etc. This product needs to be banned and the corporate management with immoral values need all to go to Jail for this ! There need to be full healthcare costs paid for by Monsanto for these disease cases. Also, the near extinction of the Monarch butterflies needs to be rectified with this immoral corporation and its criminal leaders held responsible financially for this treatment to bring back the Monarchs, the bees and many other insects/birds/other affected species very adversely affected by glyphosate poisoning of the environment.
Sincerely, Karen Young
